About Iran

Where is IRAN

This country is the second largest country in the Middle East and the 17th largest country in the world, and its area is 1648195 square kilometers. This country is one of the best destinations for transit capital and trade due to its attractive business environment with, high capacity and advantages such as strategic geographical location, climatic diversity economic capacity, energy strength and security, and domestic and regional markets.

2- The geographical location of Iran

Iran is considered a powerful and unique country in the following areas.

1. Being located at the intersection of the Middle East, Asia, and Europe.
2. Enjoyment in the field of regional and extra-regional trade, customs, taxes, and transitory capital.

Iran has access to more than 5,800 square kilometers of coastal strip due to its shared water border with the Caspian Sea in the north and the Everlasting Sea of the Persian Gulf and Oman in the south. Iran has a special place in global transit due to its access to Eurasian countries from the north, Central Asian countries from the east, the land border with Turkey, and the use of the “Silk Road”. The above-average geographic location of the Atlantic Ocean lines of communication has made this country a transit hub in the North and South entrances and plays an important role in the international economy.

Climatic characteristics

Iran is one of the most unique countries in the world in terms of specific climate and four seasons. Iran has 11 of the 14 types of climate in the world.

This climatic position in Iran has created different types of natural landscapes, and it rarely exists in other countries of the world.

The nature of Iran's climate includes diverse and abundant vegetation and animal ecosystems, and it is amazing in terms of diversity and number compared to other countries in the world. The diversity of Iran's vegetation is more than twice that of the European continent and almost equal to the Indian subcontinent.

Population of Iran

The population of Iran is approximately equal to 82.16 million people in an area of 1648195 square kilometers.

And its growth is 1.24 percent.

The currency of Iran

The currency of Iran is Rial. This word is a Spanish-Portuguese word that was created since its presence in the Persian Gulf and entered the Persian language to communicate with Iranians.

Approximately from March 21, 1932, the gold-backed Rial replaced the kran, and it is the official currency of Iran until today.

Economy of Iran

Iran's economic position is diverse and it is active and undemanding in the field of hydrocarbon reserves. This country is the fourth oil producer and the second country in the field of gas reserves, as well as the tenth country in the field of tourism and the fifth country in the field of ecotourism in the world.

This country ranks 4th to 10th in the field of mineral reserves, including zinc and cobalt, first rank in the field of aluminum, manganese, and copper, and the 4th rank in the field of agricultural production in the world.

Economic advantages of Iran

- The 18th largest economy in the world based on the purchasing power parity index (PPP).
- It has a dynamic and extensive economy that directly participates in the Tehran Stock Exchange (TES) and the Iranian Foreign Exchange (IFB) and forms the largest industrial base in the Mena (MENA) region.
- It has rich natural resources.
- It has economy with an abundant workforce.
- It has young and educated population.
- It has huge domestic market.
- The Middle East market is an opportunity for Iran's non-oil exports.
- It has developed infrastructure in transportation, telecommunications, and energy.
- It has a strategic location that includes 15 land and water borders, which are beneficial routes in the directions of north and south, east and west.
- It has exemption and tax incentives.
- It has strong and diverse hydrocarbon resources.
- The fourth oil producer in the world.
- The second country in the field of gas reserves.
- The largest producer of zinc, lead, cobalt, aluminum, manganese and copper in the world.
- The seventh country in the world in the field of agricultural products.

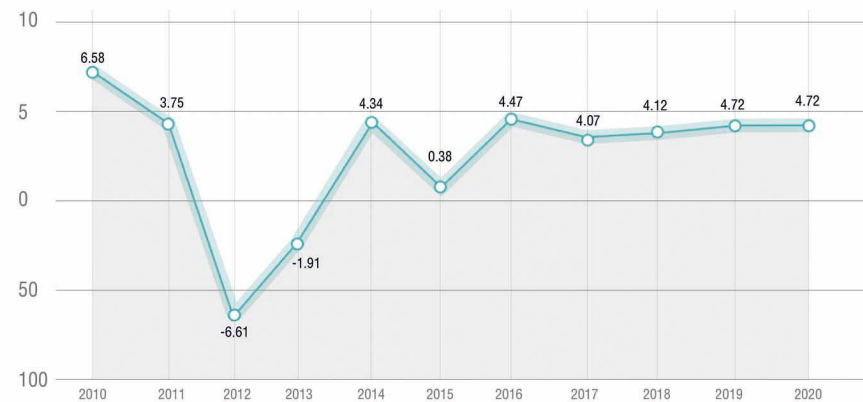

Gross domestic product of Iran

Iran is the 22nd largest economy in the world based on purchasing power parity in terms of GDP. According to the World Bank's list, Iran is ranked 50th based on GDP. Chart of Iran's GDP from 2010 to 2020.

According to the statistics of the World Bank, the growth of the gross domestic product (GDP) in Iran in 2008 was 8.7 percent. Iran's GDP in terms of purchasing power parity has been around 841/7 billion, and according to this, Iran's economy ranks 16th in the world after Australia and above the Netherlands, Sweden and Belgium.

IRAN in the ceramic factories in the world

The country of Iran, with its history and ancient civilization, as well as having large reserves of raw materials in the field of tiles and ceramics, has been prominent. The first production of tiles in Iran was around 1250 BC, which included all kinds of glazed bricks and decorative tiles. To make tiles, the process of firing clay in the kiln and glaze is used, and this soil must have 20 to 30% silica, this soil is the most suitable soil for tile production, which is found in abundance in Iran. Iran ranks sixth in the field of tile and ceramic production in 2020 in the world.

The head of the trade association of tile and ceramic producers says that 450 thousand of people work directly and indirectly in this industry. And the goal of this industry is to produce 700 million square meters and export two billion dollars by 2024 and 2025. Iran's tile and ceramic industry have 140 production units, 90% of which belong to the private sector. Yazd province has the first rank with 60% of production in this industry, and there are more than 100 tile and ceramic factories in Yazd province.

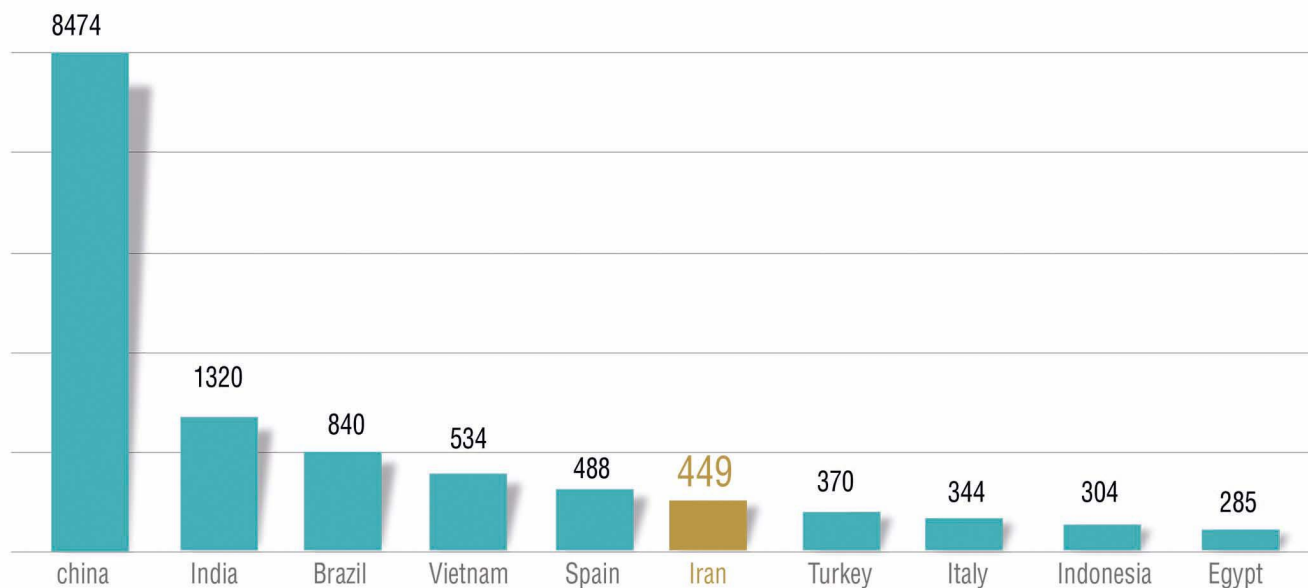

Chart of the top 10 ceramic tile producing countries in the world

City of ceramic

The tile and ceramic industry is one of the most advanced industries in Yazd province, and this industry is very important in Yazd province. One of the important advantages and privileges of Yazd province is having factories, companies, and mines related to the tile and ceramic industry. Yazd province is one of the most important centers of tile and ceramic production and has much evidence of the existence of Islamic tiles and ceramics in the first centuries. In Yazd province, tiles and ceramics were produced by hand, until 1978. The first production in this industry was in the decade of 1971 to 1981. And in 1991, this industry developed in Yazd province and caused various productions of tiles and ceramics, and also has the first rank in the production of ceramic tiles in Iran.

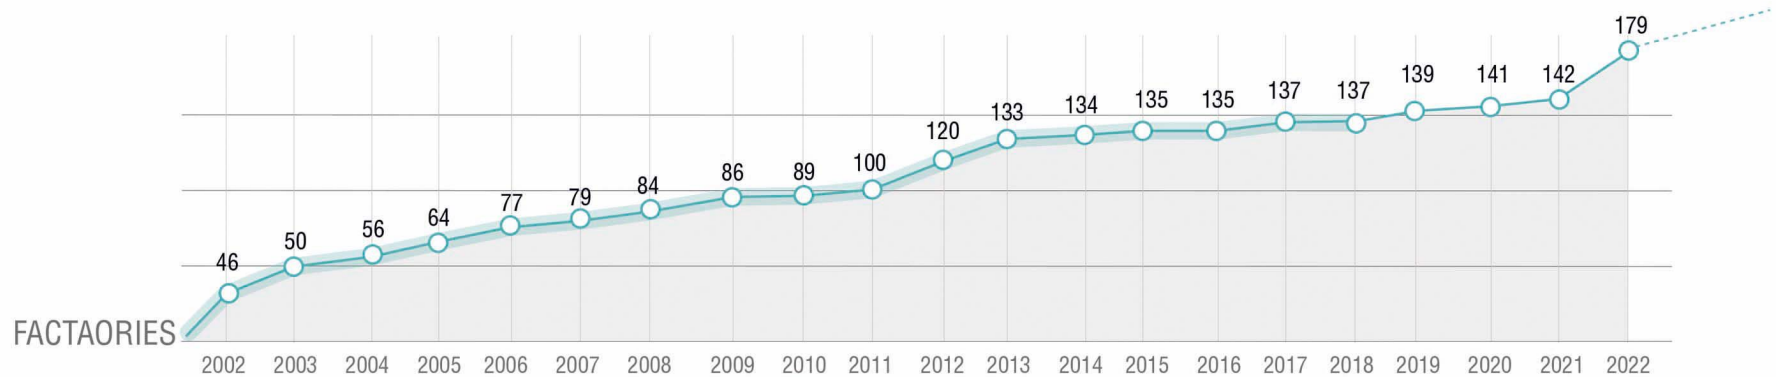

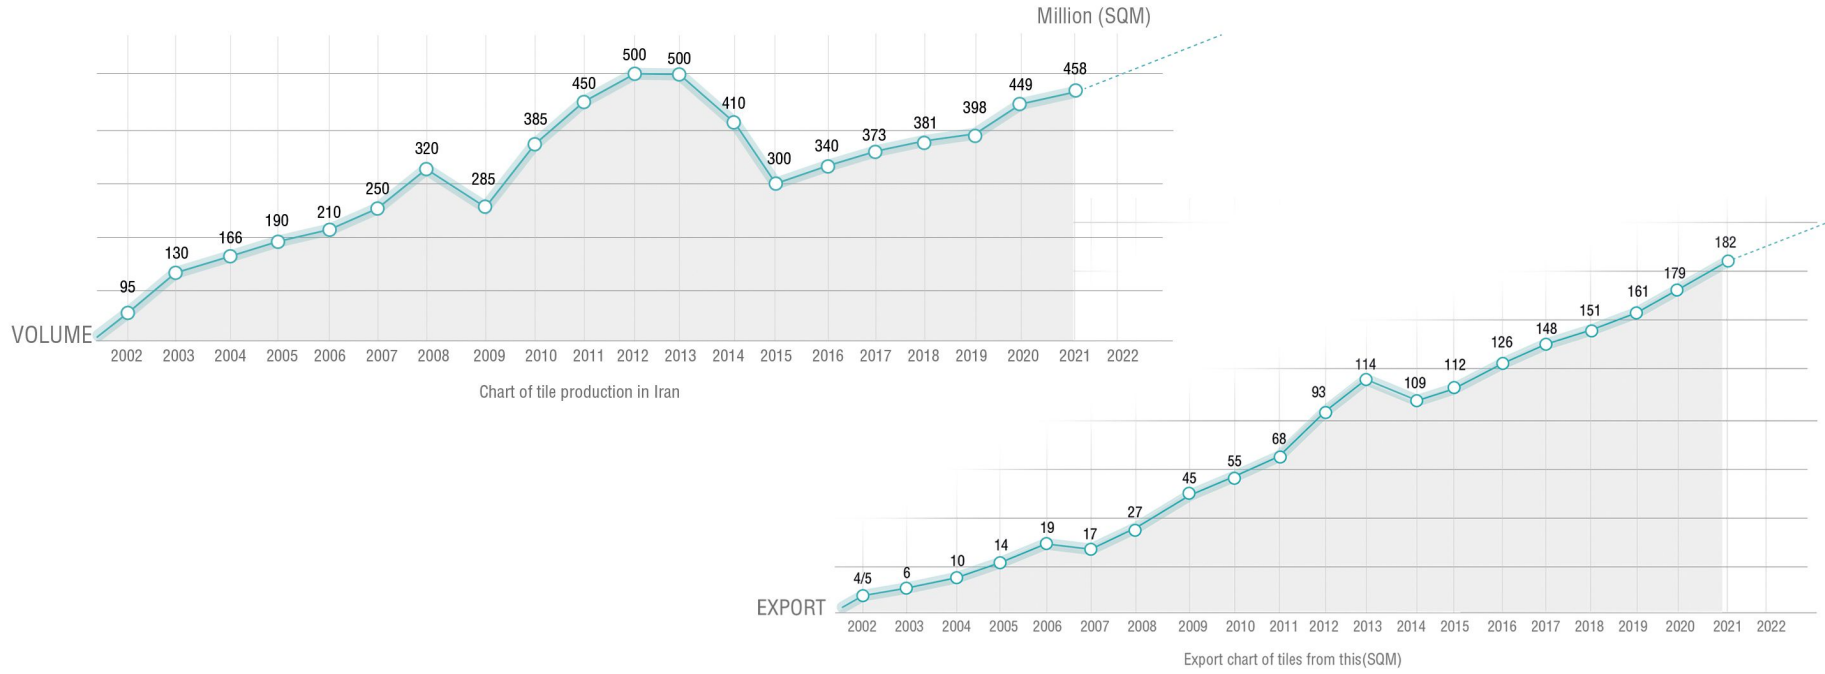

Diagram of the construction process of ceramic tile factories in Iran

Export of tile from Iran

The production of ceramic tiles was about 460 million square meters in 2021. About 182 million square meters of the total production of ceramic tiles were exported to 52 countries, of which 70% were exported to IRAQ. And according to the statistics, a large part of the export of ceramic tiles has been to Iraq. Also, the countries of Afghanistan, Pakistan, Turkmenistan, Georgia, United Arab Emirates, Tajikistan, Armenia, Uzbekistan, and Azerbaijan widely buy Iranian tiles and ceramics.

From 2021 because of gas problem around the world new markets open in Europe and CIS countries especially Russia. Huge elements of porcelain product by European standards coming from else countries and most of them satisfied with Iranian goods and variety .for these reasons, during 2021 and 2022 you can see Iranian ceramics volume for these new markets.

ИНТЕРНЕТ-МАГАЗИН ИРАНСКОЙ КЕРАМИЧЕСКОЙ ПЛИТКИ

После нескольких лет анализа рынка, исследования социальных и продуктовых тенденций формируется основа для стратегического дизайна.

Это исследование привело нас к созданию все более элегантной, универсальной и современной коллекции.

Серампахш (компания экспортных услуг с 18-летним опытом) решила создать первую роскошную премиальную дизайнерскую компанию в Испании-Кастеллон.

Компания «АНДИАГРЕС» была зарегистрирована с использованием современного Иранского искусства и Итальянской технологии для внедрения спеченной керамики размером до 120*270 см и толщиной от 8 мм до 30 мм для внутреннего и наружного применения.

Мы являемся крупным Иранским производителем и экспортером керамогранита и строительных материалов с блестящим прецедентом и приоритетом в более чем 20+ странах с широкой сетью дилеров и дистрибьюторов.

Мы верим в качество, мы стремимся к процедурам наполнения, которые позволяют нам работать максимально эффективно. Мы стремимся выбирать сырье и использовать самые инновационные технологии, чтобы сделать нашу продукцию превосходной с модным дизайном и размерами.

Наша команда состоит из энергичных людей, которые постоянно подталкивают нас к совершенствованию. Мы всегда хотим сделать больше и сделать это лучше. Нам нравится все, что мы делаем каждый день.

В настоящее время мы производим следующие продукты: (информация о размере) (см) 30*30, 60*60, 40*40, 60*120, 80*80, 80*160, 100*100, 120*120, 120*240, 120*270

Все эти продукты в нормальной толщине от 8 мм до сверхмощных на 30 мм, а также все необходимые размеры по вашему заказу могут быть изготовлены.

Загрузить мелкий заказ (один грузовик) в кредит для доверительного отношения после подписания контракта.
